Small Volume Commercial Gas Service - Firm

Availability

This service rate will be applied to commercial and industrial customers for ordinary business purposes, including space heating, whose natural gas consumption is less than 15,000 therms in any 12 consecutive billing months. The customer will be removed from this Rate Schedule if the customer no longer qualifies for service under this Rate Schedule. An annual review will occur in June. If the 12 months usage increases to 15,000 therms, the customer will be transferred to the Cg-2 rate schedule. The customer shall remain on the assigned schedule until the next annual review. This requirement may be waived if, upon determination by the Company, a customer’s annual consumption has been affected by extreme weather conditions. Changes in rate classification will be effective for the billing period immediately following the determination of eligibility and customers will be bound by the terms and conditions of the new Rate Schedule.

Where service to an apartment building is measured through one meter and when there are four or less residential units, service shall be billed at the residential rate. When the building contains five or more residential units, service shall be at the appropriate commercial and industrial distribution rate schedule. If the building has separately metered residential units, service to the public areas and for other common usage shall be billed on the appropriate commercial and industrial distribution rate schedule.

Service by the Company under this Rate Schedule shall be on a firm basis.
